

Touch Free Exit Buttons

Features that make a difference:

- Brushed Stainless Steel finish for aesthetics and ease of cleaning)
- Infra-Red operation so no mechanical moving parts
- Adjustable timer allowing for different installation scenarios
- Flush and surface mount to suit the application
- Adjustable range to provide egress when required and reduce false signals
- Change-over-contacts making it compatible with all access control systems

Touch Free Stainless steel Exit Buttons

The DRB-IR is a rugged, touchless switch built with advanced Infrared technology.

Ideal for use in sterile environments such as hospitals, food processing plants and clean rooms.

Its stainless steel construction makes it easy to clean and sanitize. Touchless Switch activation helps reduce the spread of bacteria and infectious diseases. These devices are also ideal for buildings used by disabled or elderly people as they remove the need for full dexterity for operation of the device, unlike traditional egress buttons.

This touchless switch device combines ease of use with aesthetics as it does not have the traditional button or dome operated switch mounted. It is therefore becoming a standard requirement in many system designs and removes a mechanical device from the installation increasing reliability of operation.

Visual Feedback

The touchless device provides visual indication when motion is detected within the detection zone. When movement is 'seen' by the touchless sensor, its illuminated ring around the hand symbol changes from standby red to green.

Mounting

Offered in a standard single gang plate size it is made from durable stainless steel. The touchless switch is available in either surface or flush mounted.

Data Sheet

Touch Free Exit Button Specifications

Input.....12Vdc
 Contact Rating 1A @ 30Vdc, 0.5A @ 125Vac
 Output.....N/O - COM - N/C
 Mechanical Life.....1,000,000 tests
 Range4cm - 10cm
 Timer0.5sec - 25sec
 Operating Temperature . . . -20°C - 50°C
 LED Indicator.....Red LED = Standby, Green LED = Switch activated
